

CAMPGROUND SAFETY

PORTABLE GENERATOR SAFETY: MISUSE CAN RESULT IN CARBON MONOXIDE RISK

- Always read the operator's manual first
- Choose generators with CO shutoff systems that meet ANSI/PGMA G300 standard requirements
- Keep it outside and far away from doors and openings
- Point fumes away from trailer, tent and people
- Know the symptoms (headache, dizziness, nausea, fatigue, shortness of breath)
- If you feel symptoms, leave right away
